

# Aloha

The AF2 Turbo SLX is the big brother shortboard to the AF1 Tour. The scaled up dimensions increase the overall foam volume, providing additional paddle power and stability, while still maintaining the plan shape and rocker profile required to surf at the highest level. The perfectly proportioned foil through the nose and tail, and a neutral rounded squash tail combine to produce lightning fast response.

The AF2 Turbo SLX is another favourite with the Aloha team riders offering pro level performance with a touch more forgiveness. From small junky beach breaks to pitching hollow power, this board is fast, lively and should be considered the backbone to a high performance shortboard quiver.

Single Concave

Neutral Rail

2-5ft Waves

Intermediate - Advanced

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
5'10"	18 1/2"	2 1/4"	25 ltr	FCS M5	0-143lbs (0-65kg)
6'0"	18 3/4"	2 5/16"	27 ltr	FCS M5	154lbs (70kg)
